Peer Review

Name	Student ID	Contribution	Additional
William Guida	s3707064	20%	<ul style="list-style-type: none">- Attempted to deploy and successfully push both backend and frontend images to AWS.- Worked with Alin and Angela to compile and gather documentation for milestone 3.
Grace Kerr	s3723465	20%	<ul style="list-style-type: none">- Product Backlog.- Frontend development working alongside Su.- Worked specifically on the different dashboards for each user type, making them unique.- Github repository file management.
Su-Kuen Koh	s3769533	20%	<ul style="list-style-type: none">- Front end development- Worked on enhancement (recommender system to suggest additional services that may be of interest to a customer, when they make a booking)

			<ul style="list-style-type: none"> - Worked on adding backend api endpoints to accommodate enhancement addition - Worked on AWS deployment
Alin Cimpean	s3780838	20%	<ul style="list-style-type: none"> - Product backlog - Documentation for sprint 3 including Planning, retro and the meeting minutes for our scrum meetings. - Facilitated scrum meetings as the dedicated scrum master. - Updated sprint backlog and trello task board. - Updated product backlog to account for enhancements.
Angela Alviano	s3782264	20%	<ul style="list-style-type: none"> - Documentation for sprint 3 which was planning, retro as well as meeting minutes. - In the backend I implemented the booking controller as well as the booking repository and booking service. - I also added some functionality for encrypting the passwords before they are stored in the database.

New user Stories

User stories 19 + 20 are enhancements we intended to implement in milestone 3

User story 19 is being able to add profile pictures to your account

User story 20 is being recommended similar services to the one you just booked after you finish.

New code

All updated code is located at:

majorproject-7-tues-14-30-4/FrontEnd/src

Most, if not all, files were updated on the frontend to allow for new functionality and code.

New functionality

Admin:

- Create workers for their business
- Delete workers from their business
- Create bookings for their business

Customer:

- Can book a service
- Can see the services they are booked in for on their dashboard

Worker:

- Can see what services they are assigned to work
